// PROFILE

Full Stack Developer engineering production-grade web applications across the entire stack — from typed REST APIs and relational/document data models to real-time WebSocket features and AI-driven functionality built on the Claude and Gemini APIs. I ship fast: designing, building and deploying complete products end to end, picking up new tools and frameworks on demand, and writing code built to scale beyond the prototype.

// EXPERIENCE

Self-Employed Full Stack DeveloperFeb 2024 — Present
Geseke, Germany

- Designed and shipped full-stack web apps end to end with React.js / Next.js on the frontend and Node.js / Express.js on the backend.
- Built REST APIs with authentication (JWT), file uploads and real-time features using Socket.io.
- Modeled and queried data across MongoDB (Mongoose) and PostgreSQL (Prisma ORM) depending on project needs.
- Integrated LLM APIs (Anthropic Claude, Google Gemini) to turn raw data into natural-language insights and recommendations.
- Implemented responsive, accessible UIs with Tailwind CSS and shipped to production via Vercel and Docker.
- Used Git/GitHub for version control across multiple independent full-stack projects.

// PROJECTS

FinTrack — Personal Finance Trackergithub.com/r671h/FinTracker

Full-stack finance tracker with multi-account balances, CSV transaction import with auto-categorization, dashboard analytics and an AI finance analyst chat powered by the Claude API.

Next.js 14Express.jsMongoDBJWTRechartsZustandDocker

MyMessenger — Real-time Chat Appgithub.com/r671h/MyMessenger

Real-time messaging platform with 1:1 and group conversations, media uploads and online-status presence, built on a Socket.io + PostgreSQL backend with cookie-based JWT auth.

Next.jsReactExpress 5Socket.ioPostgreSQLPrismaCloudinary

AI Weather Forecast Assistantgithub.com/r671h/WeatherAiForecastAssistent

Weather app that goes beyond raw numbers: an Express backend feeds live weather data to the Claude and Gemini APIs to generate plain-language, activity-based recommendations, shown in a glassmorphic Next.js UI.

Next.js 14/15TypeScriptTailwind CSSExpress.jsClaude APIGemini API

E-Commerce Storefrontgithub.com/r671h/my_shop

Full-stack online store with product catalog, JWT-based auth and a shopping cart. Next.js 16 frontend (SWR for data fetching, SCSS modules) backed by an Express + MongoDB API with bcrypt-hashed passwords, deployed live on Vercel.

Next.js 16React 19SWRSCSSExpress.jsMongoDBJWT

// EDUCATION

Junior Bachelor in Computer TechnologiesCompletedSep 2024 — Jul 2026
College of Computer Technologies, Zaporizhzhia National University

German B2 for Professional PurposesCompletedJan 2026 — Aug 2026
Kolping Bildungswerk, Germany
